One Month.....1 00
One year.....10 00

Wheat harvest is not quite over yet.

Go and see Ed. and Judd at the Exchange Barber shop. 32.-tf

A door key found a few days since has been left at this office.

Dr. Arnold is turning people away nightly in Santa Fe.

Five Winchester rifles in a row give the agents office at the depot quite a warlike appearance.

Lockhart & Co. are making the front of their furniture store on railroad street almost entirely of glass. They are bound to have light on their large stock of goods.

Smith & Hutton transferred 750 kegs of powder from the depot to the new house east of the arroyo one day this week. The powder will be used in blasting down the line of the road.

The GAZETTE has received a copy of the Public Land Laws of the United States. Compiled by D. H. Tallott, Sioux City Iowa. This is a valuable work for the use of attorneys and of persons proposing to purchase or homestead public lands.

Dr. Sutfin has torn down the adobe wall around his door yard and is using the material to build a laundry. The wall will be replaced by a neat picket fence as the doctor is determined that the grand View house shall be all that is implied in the name.

Charley Jewett had rush off up to Colorado to get bath for his house but he made it all right and will have his hotel finished, ready to open out in ten days. A flag pole on top of the house, sixty five feet above the street bears a large blue streamer.

Don. T. Edwards, an old time printer, who has been down the line of the railroad says the grading for the first eighteen miles will be completed in a few days and that for the next 45 miles the work is so far advanced that it will not delay the track layers.

It is reported apparently on good authority that there is enough money in the county treasury belonging to the school fund to provide free schools for all the children in the city this Winter. It looks as though the schools should be opened, as it now the money is lying idle in the hands of the officials.

It is thought from recent actions that some of the men whose duty it is to hunt up the stage robbers have come to the conclusion that they have not lost any of that kind of men, and that if the government wants them it may come on and hunt them. The stage robbers are bad medicine.

Horace H. F. Hamlin, dealer in groceries, wood and willow ware fruits and vegetables and choice liquors inserts his advertisement in another column. Mr. Hamlin, will be found at the Mining Exchange Building, East Las Vegas and has a large, new and well selected stock of goods which he sells at the most reasonable rates. Go and examine his goods.

NOTICE TO TRAVELERS!!!

I have leased, what was formerly known as, the Jewett House, situated on the South side of the Plaza, in Las Vegas N. M., and am now prepared to furnish first-class accommodations to the traveling public. I have had the Hotel thoroughly cleaned and renovated from cellar to garret. The furniture is all new and the tables will be abundantly supplied with the best that town and country will afford.

I have a Livery Stable and Corral in connection with the Hotel, and the only Bus line in the city: My bus line will carry passenger from the Depot to any part of the city, and passengers stopping with me, can always find ready means of visiting the Hot Springs with new vehicles and safe teams. The Stage offices of the Santa Fe line are connected with the hotel buildings, and persons stopping with me, who wish to go further west can take the stage at the door of the Hotel.

Large rooms on first floor for use of Commercial Agents.

GEORGE PARKER, Proprietor.

Excursion Sunday.

A special train of first class cars will leave the depot Sunday morning for an excursion to the Mora cañon. Mr. Giles has been canvassing the subject and finds that it promises success. The fare has been reduced to \$1.00 for the round trip, 75 tickets have already been sold and that many persons are assured. Those desiring tickets will see him. No one will be allowed on train without ticket. No complimentary tickets will be issued.

The Rev. Thomas Harwood of Tip-tonville or more properly of this M. E. district has been passing a few days in town looking after the interests of the congregation here. The special object in view at this time is the building of a house which will afford a place of worship permanently. Several informal meetings have been held but without any very definite plan of action being decided on. A canvass will be made and it is thought that a number of men will subscribe liberally if the subscriptions are on certain conditions: As that five men shall give \$50 each, ten men half of that amount and so on till the amount required to build a house is secured. While Mr. Harwood is not authorized to make promises, he has no doubt that the church extension fund of the general conference will contribute liberally to help build and furnish a house at this point. Many of the new arrivals here are anxious to see a church erected and will contribute liberally. Col. Steele will donate lots near those selected for the Episcopal church, in a choice location at the crossing of two streets. It looks now as though the church might be built before Winter.

A Gazette reporter who was up until after sunup yesterday morning was treated to a splendid view of Bald Mountain. The mountain gleamed and glistened in the morning light like crystal, and in fact looked almost as though covered with snow. At the same time a dark cloud threw over the town a deep shadow which by contrast increased the brightness and beauty of the mountains. A lady who witnessed the sight, vision, shall it be called? was perfectly delighted declaring that it filled her ideal of what mountain scenery would be. The scene in its beauty and magnificence was worth staying up all night to see.

The discussion of the school question in the GAZETTE of the last few days has been received with a great amount of interest. Besides, if there is more than one side, should be fully and freely discussed and the people will then be prepared to act intelligently on the subject.

The New Mexican says that the men who were arrested two weeks ago for robbing the stage are safely confined in jail at Santa Fe, but stage robbing goes on, and the driver, who ought to be posted, says that the same men did the work both times. It will be rather hard on the boys to have lay in jail till November and then on trial be found not guilty.

Personals.

Miss Emily Pendaries and Miss Emma Nordhaus came down from Rincon Teolote Tuesday to attend the party that evening and visit friends.

Mrs. M. H. Turpen, wife of the Optic editor arrived from her old home at Richmond, Ind., Monday evening and is stopping at the Parker house.

Judge Levi Davis of Alton Illinois who has been in the city during the summer started on his return home Tuesday. His daughter Mrs. W. B. Stupp with her two children, accompanied him. The latter will remain a couple of months visiting friends.

A large consignment of copper from Clinton for Baltimore was on the platform at Over Seiler & Co's Warehouse.

The large commission houses are not sufficient to hold all the goods arriving here and whole train loads are stored on the platforms.

When a street is once laid off and opened it becomes the property of the public and no one man has a right to block it up by stopping his team and camping out. In all this county there is plenty of room to camp without blocking the streets as is done in the new town daily and hourly. If the new town has any officials they should abate the nuisance.

A HACK FOR PASSENGERS

Runs for this House to and from the Depot.

LOTS FOR SALE AT THE HOT SPRINGS OF NEW MEXICO.

The completion of the Atchison Topock & Santa Fe Railroad to Las Vegas and the Hot Springs and the fact that they, the greatest corporation of the age, have recently become the owners of these springs, their policy being to spend no money to make the ground attractive, and to furnish ample Hotel and Bath accommodations to meet the demands of their patrons. By their grand system of advertising, and the liberal spirit that they have always shown toward the traveling public, makes it an accomplished fact that the Hot Springs of New Mexico is destined to become the greatest Sanatorium and Tourist Resort in America.

The grounds at the Springs have been laid out in lots and parks to suit the wants of the home, pleasure, and health seekers, the capitalist, and all who want a desirable place to live, where health and good society can be obtained. These lots both for business and residences are now offered for sale at a very reasonable price. These

Remarkable Springs

although until within a few years comparatively unknown to the outside world, have a local reputation which antedates the present century, and from time immemorial have been resorted to as the "Great Siphon" by the natives of this Territory. The mineral constituents of these waters closely resemble those of the Hot Springs of Arkansas, and the famous Thermal Springs of Europe. The Pictorial in the valley of the Rhine, and the Plombieres, the popular resort of France, situated in the valley of the Vosges Mountains, and the Leux in the picturesque valley at the foot of the pass over the Gemmi Mountains. At these springs thousands of invalids visit annually, and are

Cured of the Diseases of the Blood

Skin, stomach, paralysis, gout, rheumatism, gravel, Catarrh, and female complaints by both in and drinking the water. People visiting the Hot Springs of New Mexico have been cured of all of the above diseases, and even more. It is the invalids paradise. The great Sanatorium of the world for lung diseases. The atmosphere is clean and dry, and pulmonary and miscellaneous complaints are scarcely known.

The proportion of deaths from consumption here being smaller than in any state or territory in the Union. The mean annual temperature at these Hot Springs is 50° Fahr, being at an elevation of nearly 6400 feet. Summers are cool; nights from 55° to 60°, and the winters are remarkably mild and dry, the temperature seldom falling below the freezing point. The rainy season is in July and August. These Springs are located in about 35 degrees of north latitude, which makes the climate mild and temperature unmarked by extremes either of heat or cold. The bracing air, its mountains, the gorgeous picturesqueness of its canyons and valleys combine to make it one of the most pleasant resorts for tourists. Only 36 hours ride from St. Louis. After leaving La Junta, Colorado, until reaching the Springs the traveler sees spread before him a vast panorama of mountain, valley, and rocky canyons, stretching hundreds of miles. No better place can be found for the stock-grower to live and raise his family than at the springs.

With all of the above advantages the duldest of comprehension cannot fail to see the advantage of an early investment in property in and about the Springs, as there are but a few hundred lots for sale, and they will soon largely enhance in value from the prices now asked.

A Word to the wise is Sufficient.
